

# VERSION 2 UPDATE INFORMATION

Some Time Later has been updated and has the following new features:

\* Cyrillic character set! A friend sent me an image of a SpongeBob comic book published in Russia. Normally i wouldn't care about something like that, but it showed that the size of the canon was larger than i previously thought! i diligently sought out as much material as i could find online about the comic and got to digitizing. if you find a problem, please let me know.

SOME TIME LATER...

Unfortunately, i had a lot of trouble finding the lowercase. i believe that in order to save time, the producers of the comic book used a different, but similar font for the lowercase and only made Cyrillic capitals. The font that they used for the lower-case is a different SpongeBob font called "Spongefont SquareType" (which ironically, the version online also has no Cyrillic char-set - maybe that's my next project).

Luckily for you i know enough about font design to make the lower case by myself...Nickelodeon should be paying me for this :D

У меня было много веселья делает кириллический набор символов.  
НАСЛАЖДАТЬСЯ! Моя семья на самом деле украинский лол

\* experimental auto-kerning via FontForge's auto-kern algorithm. if you think it's kerned too tightly let me know (KERN)  
\* a new alternate character which is used in the Russian SpongeBob logo: a -> a (SALT)
